

# ISO/IEC 20000-1 Gap Analysis Template

#### Introduction:

The purpose of this gap analysis is to assess the current state of our organization's IT service management practices in relation to the requirements outlined in ISO/IEC 20000-1:20XX. The findings from this analysis will help identify gaps and areas for improvement to ensure compliance with the standard.

#### Instructions:

- Review each requirement of ISO/IEC 20000-1:20XX listed below.
- Evaluate the current status of your organization's IT service management practices against each requirement.
- Indicate whether the requirement is fully met (FM), partially met (PM), or not met (NM).
- Provide comments or notes to explain the assessment and identify specific areas of concern or improvement opportunities.

### Gap Analysis Checklist:

| ISO/IEC 20000-1:20XX Requirement                    | Status (FM/PM/NM) | Comments/Notes |
|---|-------------------|----------------|
| 1. Scope of the Service Management System (SMS)     |                   |                |
| 1.1 Definition of the scope of the SMS              |                   |                |
| 1.2 SMS processes and services covered by the scope |                   |                |

| ISO/IEC 20000-1:20XX Requirement   | Status (FM/PM/NM) | Comments/Notes |
|--|-------------------|----------------|
| 1.3 Justification for any exclusions from the scope                              |                   |                |
| 2. Normative References  |                   |                |
| 2.1 Identification of applicable legal, regulatory, and contractual requirements |                   |                |
| 2.2 Documented evidence of compliance with applicable requirements               |                   |                |
| 3. Terms and Definitions   |                   |                |
| 3.1 Understanding and use of defined terms and concepts                          |                   |                |
| 4. Service Management System (SMS)   |                   |                |
| 4.1 Establishment of the SMS   |                   |                |
| 4.2 Documentation of the SMS   |                   |                |
| 4.3 Implementation of the SMS  |                   |                |
| 5. Leadership and Governance   |                   |                |
| 5.1 Leadership and commitment  |                   |                |

| ISO/IEC 20000-1:20XX Requirement                            | Status (FM/PM/NM) | Comments/Notes |
|---|-------------------|----------------|
| 5.2 Policy and objectives                                   |                   |                |
| 5.3 Organizational roles, responsibilities, and authorities |                   |                |
| 6. Planning the SMS   |                   |                |
| 6.1 Actions to address risks and opportunities              |                   |                |
| 6.2 Objectives and plans to achieve them                    |                   |                |
| 6.3 Planning of changes to the SMS                          |                   |                |
| 7. Support of the SMS                                       |                   |                |
| 7.1 Resources and competence                                |                   |                |
| 7.2 Awareness   |                   |                |
| 7.3 Communication   |                   |                |
| 7.4 Documented information                                  |                   |                |
| 8. Operation of the SMS                                     |                   |                |
| 8.1 Operational planning and control                        |                   |                |
| 8.2 Service requirements                                    |                   |                |

| ISO/IEC 20000-1:20XX Requirement                      | Status (FM/PM/NM) | Comments/Notes |
|---|-------------------|----------------|
| 8.3 Design and development of services                |                   |                |
| 9. Performance Evaluation                             |                   |                |
| 9.1 Monitoring, measurement, analysis, and evaluation |                   |                |
| 9.2 Internal audit                                    |                   |                |
| 9.3 Management review                                 |                   |                |
| 10. Improvement of the SMS                            |                   |                |
| 10.1 Non-conformity and corrective action             |                   |                |
| 10.2 Continual improvement                            |                   |                |
| 10.3 Lessons learned                                  |                   |                |

## Summary of Findings:

Based on the assessment conducted using this gap analysis template, summarize the overall findings regarding the organization's current state of compliance with ISO/IEC 20000-1:20XX requirements. Identify key areas of improvement and prioritize actions to address identified gaps.
